

Turn the insight you already gather into evidence you can act on.

Surveys, casework notes, consultations, frontline conversations: community feedback like this is too often analysed once, filed, and never revisited. Community Intelligence brings it into one secure library, reads and tags it automatically, and lets your team ask it questions directly, so the voices behind the data shape services and priorities, not just a one-off report.

Live dashboards over your shared library, surfacing trending themes and engagement activity as documents are added.

Ask the Companion in plain language and get grounded answers, with sources, and trending themes surfaced automatically.

How it works

1

Upload your documents

Auto-tagged and categorised based on their content as they're added.

2

Browse the library

View the shared content as a complete, searchable document set.

3

Ask the Companion

Ask questions, analyse the data and extract the answers you need.

KEY BENEFITS

- **One searchable evidence base:** stop insight sitting in separate reports that never get revisited.
- **Faster answers:** ask the Companion a plain-language question instead of re-reading old documents.
- **Amplifies community voice:** aggregates what engagement teams hear so it can inform policy and service priorities.
- **Secure by design:** sensitive community data stored and governed centrally, with access control.

FLEXIBLE BY DESIGN

The same platform adapts across sectors and services: dementia and carer support, housing, health partnerships, advice services. Data sources, taxonomies and dashboards are configured per organisation, so you keep your own terminology, not a one-size-fits-all template.

Proven in partnership, spanning local government, health and third sector

Currently in use with One Westminster and Kensington & Chelsea Social Council, as part of a wider multi-organisation partnership in London.

COMMERCIAL MODEL

Discovery & setup

£5,000

One-off. Configures taxonomy, context and AI guidance around your data.

Up to 20 users

£995/mo

A dedicated instance for your organisation.

Up to 50 users

£1,990/mo

Dedicated instance, higher usage headroom.

50+ users

Let's talk

Scoped to your organisation's scale and usage.

A dedicated, secure instance per organisation, banded by user count. 12-month minimum term. Pay upfront and save: 5% for a 12-month term, 10% for a 3-year term.

Interested for your organisation?

We'll scope a short discovery conversation around your data and priorities. No commitment required.
